ABSTRACT

Data on higher education enrollment in Montana for fall 980 are analyzed and compared with that of previous years. For 1980, 81.4 percent of the enrolled students attended the Montana University System, 9.2 percent attended independent colleges, and 9.4 percent attended community colleges. The enrollment rate of both institution and sector for 1979 and 1980 is compared, and the percent distribution of enrollment for state universities is indicated for 1975-81. Enrollment by class and level for each sector is compared for 1979 and 1980, and the data indicate that 88.9 percent of students are undergraduates, 5.6 percent are graduate students, and 5.4 percent are classified as post-baccalaureate and miscellaneous. Information is included on the distribution of enrollment by sex, in-migration of transfer students by a receiving institution for 1979 and 1980, the net effect of these transfers within the state, the percent distribution of in-state and out-of-state students by institution and sector for 1979 and 1980, first-time freshmen, and credit hour load by campus and level. Consolidated enrollment data from the 13 higher education institutions in Montana are appended. (SW)

ENROLLMENT IN HIGHER EDUCATION INSTITUTIONS IN THE STATE OF MONTANA, FALL 1980

Enrollment information is collected by the Commissioner of Higher Education from each college and university within the State of Montana each term. This report summarizes those data for Fall 1980 and makes some comparisons with the previous year or years.

Enrollment of students in degree credit programs in higher education institutions in the State of Montana in the fall semester or quarter of 1980 increased by 2,524 students or +8.1% from the previous fall. Table 1 shows these data.

Table 1. Total enrollment in higher education institutions in the State of Montana, Fall 1979 and 1980

Institutions	Fall enrollment 1979	Fall enrollment 1980	Change Numerical	Change Percent

Community colleges[a]	2,619	3,118	+ 499	+19.1
Total	31,315	33,839	+ 2,524	+ 8.1

[a]These figures exclude students enrolled in non-credit, community service courses and continuing education courses.

81.4% of the enrolled students attend campuses of the Montana University System, 9.2% attend independent colleges and 9.4% attend community colleges.

* Prepared by Paul C. Dunham, Director of Planning & Research

Montana State University accounts for the largest percentage of students in the Montana University System (39%) and in the state (31.8%). Table 2 shows comparative institutional enrollments for Fall 1979 and Fall 1980.

From Table 2 one can observe that enrollments increased at all campuses of the Montana University System. The largest numerical increase occurred at Montana State University while the largest percent increase occurred at Montana College of Mineral Science and Technology. All community college enrollments increased while all private colleges except one decreased from Fall 1979 to Fall 1980.

An analysis of the change in enrollment data between the two years suggests that the increase is probably more directly related to economic conditions and is not likely to have a significant impact on future enrollments.

Distribution of enrollment by institution

The proportion of the total enrollment within the State of Montana attributable to any one institution fluctuates slightly from year to year. Table 3 portrays these data for the last two years.

Table 3. Percent distribution of enrollments among institutions of higher education in Montana Fall 1979 and Fall 1980

The proportion of the total enrollment of the Montana University System attributable to any campus also fluctuates somewhat from year to year. Table 4 portrays these changes for several years.

Table 4. Percent distribution of enrollments within the Montana University System, 1975-76 - - 1980-81

From 1975-76 to 1980-81 the proportion of the total enrollment attributable to the University of Montana has continually declined while that at Montana Tech has continually increased. The other units of the system have experienced ups and downs. After several years with the same

proportionate share, Western Montana College has shown a slight increase over the last two years.

Distribution by class

Changes in the distribution of enrollments by class may be important to future planning by institutions of higher education. Table 5 provides a comparative summary of enrollment by class for the two most recent years.

From Table 5 it is apparent that only 368 or 14.6% of the increase in students is because of an increase in first-time beginning freshmen. Unclassified students accounted for 14.6% of the increase also and other freshmen accounted for 40.6% of the increase.

Distribution of enrollment by level

88.9% of the students enrolled in higher education institutions in Montana are undergraduates, 5.6% are graduate

students and 5.4% are classified as post-baccalaureate and miscellaneous. Table 6 portrays these data.

Within the Montana University System 86.7% of the students are undergraduates, 6.7% are graduate students and 6.5% are classified as post-baccalauarete and miscellaneous.

Distribution of enrollment by sex

Males account for 50.5% of the students enrolled in higher educational institutions in Montana, while females account for 49.5%. Last fall females were 49.3% of the total. Table 7 shows these data by institution for Fall 1979 and Fall 1980.

Within the Montana University System males account for 52.7% of the enrollment and females, 47.3%.

Transfer students

Transfer students constitute 10.7% of all enrollments in institutions of higher education in Montana. Of the total number of transfer students (3,636), 40.3% are transfers from Montana institutions, 57.8% are from out-of-state institutions and 1.9% are from foreign institutions. Table 8 shows the enrollment of transfer students in Montana for the years 1979 and 1980.

The number of transfer students increased from 1979 to 1980 by 594 students, amounting to an increase of 19.5%. Part of the transfer increase may be attributable to a more concerted effort at one of the community colleges in identifying students who are transferring from another institution.

Transfers among Montana institutions only are interesting. Table 9 shows the net effect of these transfers within the state.

In both years, the Montana University System received more transfer students from Montana institutions than it lost to those same institutions.

In-state versus out-of-state enrollment

Out-of-state enrollment constitutes 16.9% of the total enrollment of institutions of higher education in Montana in Fall 1980, a decrease from 18.5% the previous fall. Table 10 shows these data by institutions for 1979 and 1980.

First-time students

Students entering higher educational institutions for the first time are separately reported. There was an increase of 4.5% in number of first-time freshmen from Fall 1979 to Fall 1980, occuring mostly in the community colleges. Out-of-state first-time students declined somewhat. Table 11 shows these data by institution.

Within the Montana University System first-time freshmen increased only 2% from 1979 to 1980. In-state first-time freshmen increased slightly more while out-of-state first-time freshmen declined. The decline was primarily at the University of Montana

Part-time enrollment, exclusive of enrollment in Continuing Education programs and non-credit community service programs at the community colleges, is a significant portion of total enrollments. In 1980, part-time enrollments account for 23.6% of total enrollment in the state, up from 21.7% the previous year. Table 12 shows these data.

Within the Montana University System, all units showed an increase in both full- and part-time students, except Eastern Montana College, which showed an increase only in full-time students. At all private colleges with the exception of Carroll College, there was a decline in full-time students and with the exception of the College of Great Falls, a decline in part-time students also.

Full-time equivalent students

For some purposes it is desirable to convert part-time students to full-time equivalents. To do so, a formula which equates 15 undergraduate student credit hours (or 12 graduate student credit hours) to one full-time equivalent student is used. Table 14 portrays these data for higher education institutions in Montana for Fall 1979 and Fall 1980.

Full-time equivalent students for the fall term is a useful statistic for some purposes but for budgeting actions, a different statistic called the fiscal-year full-time equivalent (FYFTE) student is utilized. This statistic reflects enrollment for an entire fiscal year, including summer sessions. Table 15 shows a historical summary of fiscal-year full-time equivalent students within the Montana University System.

Table 15. Fiscal-year full-time equivalent enrollment, Montana University System 1975-76 -- 1979-80

Fiscal Year	UM	MSU	TECH	WMC	EMC	NMC	SYSTEM
1975-76	8,496	8,965	894	735	3,306	1,225	23,621
1976-77	8,057	9,320	991	597	3,124	1,240	23,329
1977-78	7,979	9,613	1,058	582	3,105	1,312	23,649
1978-79	7,868	9,555	1,139	643	2,910	1,149	23,264
1979-80	8,010	9,811	1,247	699	2,964	1,235	23,966

The FYFTE enrollment fluctuates somewhat from year to year, as shown in the above table. The increase of 702 FYFTE from 1978-79 to 1979-80 is a 3% change.

Distribution of student credit hour load

When converting headcount enrollment to full-time equivalent students, a factor of 15 student credit hours at the undergraduate level and 12 at the graduate level is used as the normal load for a full-time student. Table 16 shows the distribution of student credit hour loads for graduate, undergraduate, and other students within the Montana University System.

Consolidated Enrollment Report

The reports which are contained in this appendix present enrollment data for all institutions of higher education in Montana.

Definitions applicable to these reports are:

Total enrollment: The number of individuals enrolled during the academic period.

Part-time student: A part-time student, for reporting purposes in Montana, is one taking less than 12 undergraduate credit hours or 9 graduate credit hours.

First-time beginning freshmen: One who entered higher education for the first time in the current semester, term, quarter or session.

Fiscal year full-time equivalent student: Total undergraduate student credit hours generated during the fiscal year divided by 45 (quarter basis) or 30 (semester basis) plus total graduate student credit hours generated during fiscal year divided by 36 (quarter basis) or 24 (semester basis).

Full-time equivalent students: 15 student credit hours for undergraduates and 12 student credit hours for graduates are considered a full-time equivalent student.

Out-of-state student: For purposes of this report, the home address of the student determines his residence category.

Prior to Fall 1977 enrollments were reported as of the end of the 5th week of classes; beginning Fall 1977 enrollments are reported as of the end of the 3rd week of classes.
